# I. Alignment of the Program with the AHC Mission

AHC Mission: Allan Hancock College fosters an educational culture that values equity and diversity and engages students in an inclusive learning environment. We offer pathways that encourage our student population to achieve personal, academic, and career goals through coursework leading to associate degrees, certificates, transfer, and skills building.

#### a. Have there been any changes that would require a change to your Program Mission?

PCPA offers comprehensive, professional training for actors and technicians in its two-year vocational Technical Theatre Certificate Program and Professional Internship Program with the goal that, upon completion, students have the necessary skills, professionalism and artistry to enter the working market and succeed. The class schedule is creative and rigorous and involves a blend of lecture, applicable labs, special projects and rehearsal, as well as seminars and master classes in specialized areas of study. The program is unique in that the Conservatory student receives mentorship from working, professional artists in the context of the classroom and while producing PCPA productions. Each class is comprised of approximately 10 - 12 technical students, with two cadres (1st and 2nd year) of students progressing through the program concurrently for a maximum program admission of 24. This limitation on enrollment is based on available lab space and production opportunity. Admission to the Conservatory is by audition/interview. PCPA's Technical Theatre Vocational Certificate Program and Professional Internship Program are unique in California and the nation. According to Theatre Communications Group, the Association of

Professional Regional Theatres, PCPA is the only two-year vocational certificate program connected to a professional Equity regional theatre company. (TCG: *Theater Profiles*)

We have also spent time in this last year assessing our program policies, procedures, and curriculum through and Equity, Diversity, and Inclusion lens. This has been done with care and consideration for the students who have been in the program and who will be entering the program this fall. Any changes

we are making are in line with our Program Mission and that of the Mission of the Allan Hancock College.

b. Explain how your program mission aligns with the college mission.

The college mission and values can be found here: <a href="https://www.hancockcollege.edu/about/mission.php">https://www.hancockcollege.edu/about/mission.php</a>

We provide career training in a comprehensive way which improves the earning potential of our students and provides our community with a professional theatre experience. We are working to increase our awareness of all Equity, Diversity, and Inclusion issues our students face and find ways to provide an environment that acknowledges and celebrates how all differences and perspectives make a program like ours stronger. We are assessing our policies, procedures, and curriculum to verify that our classroom, labs, and performance spaces are a place that values, nurtures, and engages students.

## II. Student Success, Program Accessibility and Program Capacity

\*NO data analysis required this year.

a. Describe how the program works to promote student success (completions job placement, transfer). Include teaching innovations and use of academic and student support.

We have several steps we use to promote student success. The first is a mid-semester review in which each faculty members fill out forms addressing the student's successes and areas of improvement followed by a meeting with the student. We are going to start including Student Self-Assessment as part of the Mid Semester Evaluation Process in the Fall of 2021. Second, in the fall semester, our 1<sup>st</sup>-year students present the work they have done in their first semester with us and our 2<sup>nd</sup> years and interns go through a mock interview process. Third, at the end of the spring semester, all students present their portfolios to the faculty, staff, and the public. Finally, we are looking at different ways of conveying grades to students for labs, either in the shops or performance spaces. We are looking at rubrics as a standard assessment and student self-assessment as a way of having the student more engaged with the whole process. As a part of the second year of the program, we take the students on a backstage tour of Disneyland. This is part of seeing technology in action and part networking for the students. This was a 2-day tour that has been reduced by Disney to a single day. We are assessing what other activities, like visiting rental houses or art museums, could benefit our students as part of a trip to LA.

In preparation for getting jobs, we also take the students, through fundraising efforts done by the student, to the USITT (United States Institute for Theatre Technology) convention. This is where the students can interview for jobs or a 4-year institution to continue their education. They can also participate in seminars and masterclasses alongside professionals in the industry. This is a great opportunity to expand their network. In the last two years, the pandemic has affected our ability to take students to this conference. In 2020 the conference was canceled

and in 2021 the conference was held virtually. We hope that in 2022 the conference will be a mix of live and virtual events to extend our ability to participate with the students.

b. List any notable accomplishments of the program (student awards, honors, or scholarships can be listed here also)

Not applicable at this time.

## III. Quality and Innovation in the Program and Curriculum Review

a. Are you on track in your assessment plan for course and program SLOs? If not, please explain why.

Yes

b. Have you shared your assessments or improvement plans with your department, program or advisory committee? If so, what actions resulted? If not, how do you plan to do so in the future?

We have no new assessments or improvement plans in place since our last 6-year program review. The faculty continue to work on refining the curriculum to meet the needs of the current job market. We are also assessing our curriculum, policies, and procedures to create a more equitable, diverse, and inclusive learning environment for all students.

c. Did any of section, course or program improvement plans indicate that your program would benefit from specific resources in order to support student learning and/or faculty development? If so, please explain.

Not at this time.

d. In reviewing your outcomes and assessments have you identified any and all that indicate a modification should be made to the course outline, the student learning outcomes or the program outcomes? Please state what modifications you will be making.

Not at this time.

e. Have all course outlines been reviewed within the last 5 years? If not, please explain the plan to bring course outlines up to date and include timelines for the review and submission to AP&P.

Yes.

f. For CTE courses/programs only, as per §55003, have prerequisites, corequisites and advisories (PCAs) for courses and/or programs been reviewed within the last 2 years?

| Yes. |  |  |  |
|------|--|--|--|
|      |  |  |  |

# IV. Focus and Engagement of the Program

a. Summarize major trends and opportunities as well as challenges that have emerged in the program

In regards to design and technical theatre, the industry continues to move forward in technology. Industry cohorts are requesting more training in digital image creation and projection, carpentry and scenery building, more focused training in sound technology & signal generation and manipulation. Also, subscription-based and cloud-based services are replacing analog and wired technology in aspects of live production. These include file sharing, content creation and revision, and remote collaboration. Job availability, before the COVID-19 pandemic, had grown over 85% of our past three graduating classes have had their first professional contracts within the first year after graduation at companies including Western Stage, California Theatre Center, Summer Repertory Theatre, Hope Summer Rep. Illinois Shakespeare Festival, Oregon Cabaret Theatre, Oregon Shakespeare Festival, Mosaic Lizard Theatre, Kingsman Shakespeare Festival, Berkley Playhouse, Speakeasy Theatre, San Francisco Playhouse, San Francisco Shakespeare Festival, Utah Shakespeare Festival, Pacific Conservatory Theatre, Berkeley Repertory Theatre, Out of the Box Theatre Company, Kaiser Permanente Tours, North Coast Rep, San Diego Rep, Lambs Players, Cache Theatre Company, Great American Melodrama, Los Angeles Theatre Company, Asolo Theatre Company, Rubicon Theatre Company, Phoenix Entertainment (Adams Family and Ragtime National Tours) and Disney Entertainment and Disney Cruise Lines. The reality of what the job availability will look like post-pandemic is a large industry-wide discussion. Most believe that starting late summer and early fall of 2021 job availability will increase, with a return to job availability numbers that are equal to or increase from pre-pandemic times.

Another area being addressed industry-wide is how to make all areas of the Entertainment Industry more equitable, diverse, and inclusive. These discussions have been motivated by groups like We See You White American Theatre, No More 10 out of 12s, and End Unpaid Internships. The Faculty and Staff at PCPA have been discussing these issues as well as attending training both as a company and as individuals. We must continue to be a part of the conversation at the company level and the industry level.

The Faculty has spent much of this last year taking the lessons we have learned through our Equity, Diversity, and Inclusion training as well as feedback from students to make improvements to our curriculum, policies, and procedures. This includes reviewing our Student Handbook, Individual Shop Handbooks, and our Orientation or Onboarding processes. We are reviewing our syllabi, grading practices, and how we communicate this information to students. In reviewing our syllabi we are also assessing the material we teach in each subject matter and the way instruction is administered. All of this is being done to ensure that the student experience engages and empowers each student and meets their individual learning needs. We also continue to work on the curriculum to provide the necessary skills needed to get an entry-level job in all areas of technical theatre.

In the last two years, we have received funding from CTEA, the Strongworkforce Grant, and ETC for equipment in our Classroom (CBC19), Costume Shop, Electrics Shop, Paint Shop Scene Shop, and performance spaces that will add to the quality of our productions as well as increase the knowledge base for our students. Some of the equipment we have purchased through these funds are new Drafting Desks for CBC 19, multiple types of lighting fixtures for use in our productions, welders and other equipment for the scene shop, new sound equipment for CBC 16 and 18, new sewing machines, and scissor and personnel lifts. Please see section V. b. for the impact each item will have on our students and our program. The college has also given us funds for a new sound system in the Marian Theatre that should be in place by the fall of 2021.

There are still many challenges for our program which include wage increases, rising materials costs, building issues, recruitment, and retention issues. The wage increases being made mandatory by the state of California mean that we will have to find more funding to cover the rising cost of payroll across the board. As wages increase so do the costs of materials we need to produce the shows and teach our classes. We are yet unable to restructure the relationship between the PCPA Foundation and our need for developed income to meet our funding needs. All of these factors are leading to budget constraints which affect staffing, available materials for classrooms and production, and our ability to provide quality productions for the community.

There have been improvements to CBC with the installation of the new roof and the remodeling of the bathrooms which we are excited about for when our students return. There are still issues we would like addressed in CBC that we listed in our last Program Review which include inconsistent custodial support, especially in the cleaning of studio floors, maintenance of software updates, and network support, as well as noise from Youth Dance parents and siblings waiting in the hallways. These sound issues disrupt classes, impact work in the offices and dictate the class schedule, as Design & Tech classes cannot be scheduled opposite Youth Dance classes. Moving the program from CBC, given the nature of our year-round scheduling, would be incredibly disruptive.

One of our larger concerns is the moving of our Costume, Props, and Scene shops out of Building O and into the new Building T. Jeff Allen, our Production Manager, has been a part of the design phase and continues to be a part of that process. Jeff has been consulting with the department heads of each shop to ensure that the new spaces will be set up in the most fitting way for our classes and production processes. We are grateful to be receiving new spaces and moving those spaces in the middle of a school year or during our summer internship program will cause disruptions to the learning and production process. Part of those concerns includes the labor needed to move equipment and supplies and where that labor will come from.

The Technical Theatre Training Program has also seen a fair amount of turnover in Faculty and staff positions. This includes starting searches for department heads in Sound and Stage Management, as well as staff in Sound and Scenic Construction. This allows us to take a deeper look with new perspectives into the curriculum of our Sound and Stage Management departments.

Recruitment into the 2-year technical training program continues to be the major challenge faced, specifically in:

Promoting the idea of vocation training as a viable educational option

- Changing current and long-standing perception and documentation that preparing for the technical theatre career path requires little to no training beyond a high school education or only on-the-job training.
- Promoting the success of our program and its availability as a career option in a community where the arts is not in the majority of a thriving industry.
- Shortage of affordable housing options in the area.
- Promoting the program outside of the state of California. This could be helped with a tuition waiver for out-of-state tuition or specific scholarships available to out-of-state students.
- Limited resources for recruitment purposes, which includes materials and travel.
- Limited availability for 1<sup>st</sup>-year students to receive scholarships or grants.

Retention of students is an issue in many programs. Our problem is when our maximum number of students is 12 and you lose one or more due to the inability of the student to keep up with the rigorous demand of our style of program. The limitation of students entering the program is based on our current equipment availability and the space within classrooms and shops. The perception is not good, however, those students who do successfully complete our program are truly ready for the demands of the industry and are very successful.

b. List any (internal or external) conditions that have influenced the program in the past year.

There have been several changes in Faculty and Staff Positions. During the Covid-19 pandemic, we decided to wait to fill positions until we had a clearer plan for producing shows and bringing students and interns back. When then took advantage of this time to review organizational structure and hiring practices. In an effort to address issues that were brought forward by the We See You White American Theatre, among other groups we are looking at our hiring practices through an EDI lens. This means we are rewriting our job ads and job descriptions and developing better interview processes. The first person hired with this new process is for the Sound Director position. Our Sound Director, Mitchell Hampton, was let go at the end of Spring 2020. This left us without any staff or faculty in the Sound Department. After a year of only having one person in the Sound Department, we decided that we needed to go back to our 2-person sound department model, a Sound Director, faculty member, and a Sound Engineer, staff member. This allows for the workload to be spread out between the 2 people and then the Sound Director will have more time to focus on the curriculum. We are happy to have Lindsay Putnam join us as the new Sound Director on May 10<sup>th</sup>, 2021. She will also be participating in the interview process for the Sound Engineer position. At the end of Spring of 2020, Christine Collins, the Production Stage Manager, was let go. In March of 2021 Carter Higgs, the Scene Shop Supervisor, and Henry Matthiessen, the Technical Director, have informed us that they will be leaving for personal reasons. We have posted the job ads and descriptions for all of the open Tech Conservatory Positions (Production Stage Manager, Sound Engineer, Technical Director, and Scene Shop Supervisor) and begun the search to replace all positions. We hope to have all positions filled by the beginning of June of 2021.

We continue to struggle with budget constraints due to the mandatory wage increases and the rise of the cost of materials. This struggle is compounded by the Covid-19 pandemic. We have been unable to produce shows in our traditional manner, which is one of our main revenue streams. We have been working on other revenue streams including providing virtual workshops for High School teachers and

students and other virtual play readings and performances. These are great ways of engaging the community and providing a much-needed service for High School Theatre Teachers. These activities are not able to bring in the same amount of revenue as with our traditional productions. We continue working on ways to raise funds.

As you are most likely aware, lumber and steel prices are again on the move. There a few things currently driving up the prices. These factors include the pandemic, the shipping delay in the Suez, tariffs, and the recent boom in construction on the central coast. Additional environmental factors will most likely cause the prices to continue to climb. These factors are related to the drought and the potential for an active fire season this year. The prices of lumber specifically usually oscillate with the seasons. In the winter a standard sheet of ¾ CDX plywood usually runs between \$42-\$45 and during the summer, it usually increases to about \$50 during the summer months. Usually at the height of the fire season, plywood will hit a peak of around \$52-\$55.

To give an idea of how much the pandemic has effected prices, the same standard of plywood costs \$74 which leads me to believe the price has the ability to increase by another \$10 or more once construction and fires start picking up. So far, plywood seems to be the lumber material getting hit the hardest. While the other lumber material we normally has also increased in price, nothing has jumped quite as dramatically as plywood. At this time, I'm unsure if the other lumber material will catch up to the price of plywood.

Another corner of the material market to be concerned about is the metal market. Steel prices have been relatively stable for the 5 years I've been here which is why the recent increase in prices is something to watch out for. Last year 1x1- 16 gauge box tube cost \$16 per stick. Honestly, that price hasn't gone up or down since 2016. However, the tariffs have started to effect those prices as well. Currently a stick of the same material is now costing a little more than \$18. Now \$2 isn't a whole lot, but we normally buy anywhere between 50-100 sticks of steel per production, and I usually buy an additional 100 sticks every year so I can teach our students how to weld. After talking with our steel vendor, it is a little safer to say that the prices of steel will be remaining at this rate for the foreseeable future and has the potential to increase as well.

There is also a movement in the industry to end unpaid or underpaid internships. While our internships are scholarshiped, they are on the low end of the scale. The amount of each scholarship varies based on the length of the scholarship and the internship position. We will need to be looking at how we can raise the scholarship amounts overall as well as look at scholarships based on needs.

We were granted money through CTEA funds to replace all of our Lab/classroom (CBC 19) computers in 2018, We are still in the process of acquiring these computers. IT has run into several problems finding the correct graphics cards necessary to run Vectorworks and AutoCAD, the computer-aided drafting programs taught in our curriculum. Most of the problems come from outside sources, these graphics cards are used in BitCoin mining, and supply chains have been diminished because of this and the new tariffs on electronics. IT purchased laptops with the necessary graphics cards and we plan on using the laptops instead of desktops for the replace computers for the Technical Conservatory classroom, CBC 19. We will need to set up a way of keeping the laptops secure and are working with IT for the best solution. IT will also be installing a smart classroom setup in CBC 19. This includes a teacher computer station and a 75-inch monitor. We are excited about the addition of the teacher station and large monitor for setting up the smart classroom in CBC 19.

#### Data for Program with Vocational TOP Codes (CTE):

https://misweb.cccco.edu/perkins/main.aspx

Please review the data and comment on any trends.

c. Current industry employment and wage data (please cite sources)

TCG Theater Facts 2019 – this is the most recent data available

https://circle.tcg.org/resources/research/theatre-facts

and

TCG (Theatre Communications Group) Salary Survey

https://circle.tcg.org/resources/research/salary-survey?ssopc=1

All data on industry and wages was collected before the Covid-19 pandemic and according to TCG's Theatre Facts 2019 "the financial realities of theatres in the foreseeable future will look very different from what is presented in this report." See link above for full report. According to Theater Facts 2019 "theatres added \$2.8 billion to the economy through compensation and payment for space, services, and materials. They provided jobs to 145,000 artists, administrators, and technical personnel."

According to TCG's recent <u>Salary Survey</u>, link to survey included above, the average hourly wage for a theater technician ranges from \$14.86 per hour for a Run Crew Position to \$21.24 per hour for a Master Carpenter. These numbers are all based on Non-Union positions. The wages per hour increase by 58% if the position is a Union position. The majority of our students upon graduation will be hired for Non-Union positions.

#### d. Industry employment and wage trends

According to Data USA, <a href="https://datausa.io/profile/cip/technical-theatre-design-technology#employment">https://datausa.io/profile/cip/technical-theatre-design-technology#employment</a>

Going into 2019 there was a 2.6% growth in the previous year in salaries, with the average yearly wage stated as \$60,149. There was also growth in the numbers of people in the workforce by 2%.

# f. Advisory committee recommendations

Our advisory committee last met in December of 2019. The following are their recommendations from that last meeting.

Darren Levin states that there needs to be a continued emphasis of video, projection, and lighting elements into scenic and lighting elements, integration of lighting elements into costuming (and exploring control technologies), some conversion to LED in the lighting industry but continuing to explore this technology as applicable is going to be essential to maintain prevalence in the industry, and automation of scenic elements continues to be a trend, therefore, training in this area is also going to be essential.

Tammy Honesty says that hand drafting teaches the students how to read the graphic language, slow down, and think about what they are doing, and provides the foundation to

CAD. However, the necessity to be more adept with CAD especially 3D is on the rise. Also, trends are VR/AR in the design process (which requires a higher skill level in 3D drafting). 3D printing for scale model pieces, props, costumes, and even scenic elements (sound and lighting could probably find ways to jump on board, too), and soft skills of management, communication, and collaboration are important (as always) with a healthy side of curiosity and being willing to learn or be taught.

Vincent Olivieri stated that digital networking for sound is here to stay and immersive multichannel environments are much more common than before.

Jane Childs encourages us to continue to incorporate as many outside industry entities and folks as possible to broaden your students' visions of what this industry is about and the options and possibilities that it offers to them.

# V. Continuous Improvement of the Program

a. Status of Final Plan of Action – Post Validation
 Summarize the progress made on the recommendations from your last comprehensive program review plan of action

PRAU\_\$2021 10

| PLAN OF ACTION   | ACTION TAKEN/RESULT AND STATUS  |
|--|---|
| Develop SLOs that are consistent with course   | Several faculty retreats were held with Conservatory  |
| goals and supported by current faculty.  | faculty, goals reviewed and SLOs for each course and  |
|  | program developed and mapped.   |
| Regularly evaluate SLO with industry cohorts to  | Attendant to Action #1, this evaluation is, and will be,  |
| maintain student preparedness for the  | ongoing.  |
| workplace.   |   |
| Identify new ways to promote the program and   | On-going outreach to the area, regional and statewide   |
| recruit students: Seek funding sources as  | arts magnet schools, universities, and national   |
| needed.  | organizations, together with recruitment and  |
|  | streamlined internal application processes and improved   |
|  | communication follow through with prospective   |
|  | students (coincident, in part, with a change in faculty   |
|  | leadership) has increased enrollment from an average of   |
|  | 8 students to over 20 students, over the last two years.  |
|  | This varies from year to year and we are still struggling to  |
| Provide Military alberta Costa Parkers   | find new ways to market our program.  |
| Promote within the northern Santa Barbara  | While demographics of the program indicate a relatively   |
| County community the option of technical theatre as a viable career option for women and           | positive environment for diversity among students, no appreciable strategic effort or trackable data is available |
| Hispanics.   | to demonstrate the successful promotion of the program  |
| Thispanics.  | to the specific group "women and Hispanic" candidates   |
|  | in northern Santa Barbara County. In the past two years,  |
|  | we have successfully recruited women and Hispanics  |
|  | into the program. This is will be an ongoing process.   |
| Institute curricular changes to return the   | Major curricular revisions were undertaken in multiple  |
| Conservatory to a curricular model that existed  | phases, over several years. This goal was completed   |
| before a 2002 attempt to make the vocational   | earlier. We as a program decided to undergo a further   |
| certificate program more "transfer-friendly".  | assessment of our curriculum to continue to enhance   |
| This model allowed for the integrated  | our viability as a program and meet the changing  |
| professional company and academy training  | demands of the professional world.  |
| while effectively providing a positive enrollment  |   |
| profile.   |   |
| Institute a regular retreat cycle for program  | A regular retreat cycle has not been possible due to  |
| faculty to address SLO's, core instructional and   | budget constraints, pressures and compression upon  |
| programmatic values, and industry responses to   | production timelines. Irregular meetings have occurred.   |
| the current curriculum   | The new Technical Theatre Coordinator is working with   |
|  | each department head to regularly assess the curriculum   |
| Many through The Heiter Chates tratify to Co.  | to meet the needs of the job market.  |
| Work through The United States Institute for   | Significant engagement with USITT continues as do   |
| Theatre Technology's Education Commission to   | several informal articulation agreements, but no formal "matriculation process" has been developed. Transfer is   |
| help develop a positive matriculation process for specialized 2-year technical theatre training as | not among the primary goals of this CTE program.  |
| well as general associate degree matriculation.  | not among the primary goals of this CTE program.  |
| Continue to explore options for different  | This remains a programmatic core value and is ongoing.  |
| formats for the educational content to be  | This remains a programmatic core value and is origonig.   |
| delivered, including research of best practices  |   |
| denvered, including research of best practices   |   |

| from other institutions that have a similar        |   |
|--|---|
| curriculum.  |   |
| Foster advisory group work including dialog        | The dialogue related to general training or area          |
| about the viability of jobs for the student who is | specialization continues within the faculty, with our     |
| broadly trained contrasted to the student more     | advisory groups (principally Disney and Cirque du Soleil) |
| specifically trained in one or two specific        | and with other peers in the field (via USITT and the      |
| technical fields. Because the advisory members     | Production Managers forum). Notes are available from      |
| are distant and from a range of employers, this    | the fall of 2019. We have not had students this past      |
| may need to be done on a one-to-one basis with     | year, there is no new data available at this time.        |
| notes summarized for reporting                     |   |

# b. List any new resources that the program received in the past year and the results

| Source | Specific Resource                           | Est. Amount \$ | Impact on program or course outcomes   |
|--------|---|----------------|--|
| CTEA   | Drafting Desks for CBC 19                   | \$6000         | These desks provide a better working surface for our students to learn hand drafting.  |
| SWP    | New sound systems for CBC 16 and 18         | \$2000         | Our students will have better equipment to rehearse productions and a better learning environment so that they can be better prepared for the professional world |
| SWP    | 12 domestic Sewing Machines                 | \$15803        | Our students will be learning on better technology which better prepares them for the professional world and our work on productions is done more efficiently.   |
| SWP    | 6 new motors for industrial sewing machines | \$1557         | Our students will be learning on better technology which better prepares them for the professional world and our work on productions is done more efficiently.   |
| SWP    | Electropounce                               | \$1200         | Our students will be learning on better technology which better prepares them for the professional world and our work on productions is done more efficiently.   |
| SWP    | Dust Collector ins the scene shop           | \$20000        | This helps with the safety and well-being of our faculty, staff, and students.   |
| SWP    | 2 Millermatic 120 welders                   | \$2400         | Our students will be learning on better technology which better prepares them for the professional world and our work on productions is done more efficiently.   |
| SWP    | 2 Hobart handler 210 welders                | \$1600         | Our students will be learning on better technology which better prepares them for the professional world and our work on productions is done more efficiently.   |
| SWP    | 2 Hobart Handler 180 Welders                | \$1600         | Our students will be learning on better technology which better prepares them for  |

|      |                              |          | the professional world and our work on      |
|------|------------------------------|----------|---|
|      |                              |          | productions is done more efficiently.       |
| SWP  | Milllermatic 211 Welder      | \$1200   | Our students will be learning on better     |
|      |                              |          | technology which better prepares them for   |
|      |                              |          | the professional world and our work on      |
|      |                              |          | productions is done more efficiently.       |
