Prompt Engineering for Education

Jason Gulya

Professor of English and Applied Media

AI Consultant and Strategist

Berkeley College

Step 1: Identify the Goal

Identify the Goal: What do you want to get out of it?

Step 2: Decide on the Approach

Decide on the Approach: What mindset do you need?

Step 3: Test It Out
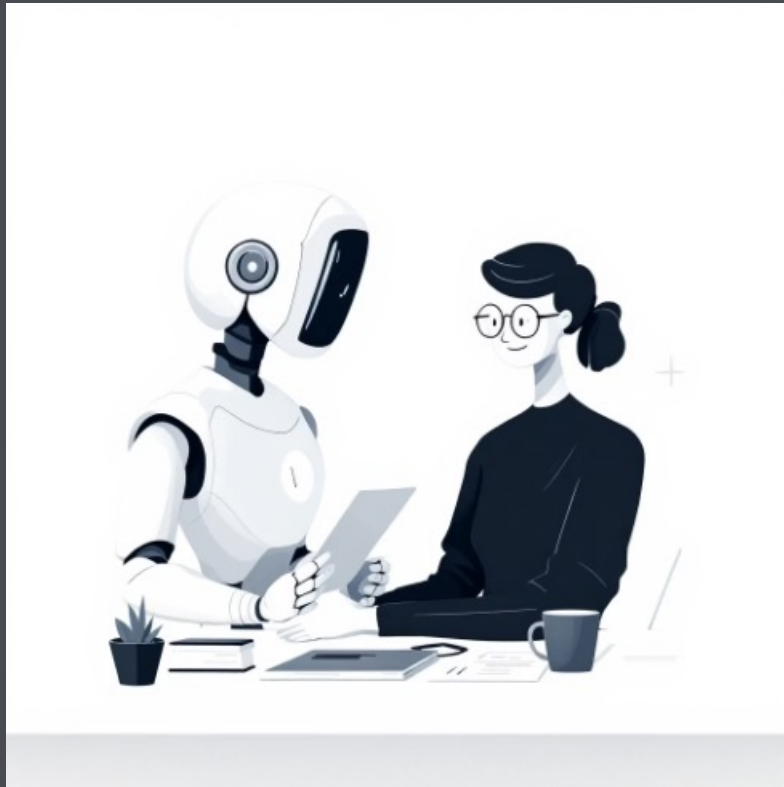

Start engaging with the Large Language Model.

Step 4: Redirect and Pivot

Don't get too rigid. Provide feedback and further refine your instructions.

Let's Talk About Step 2: The Approach

Approach #1

Use AI as a Co-Pilot

## Approach #2

Use AI as a Co-Thinker

Approach #3

Hybrid Model

* The language of co-pilot and co-thinker is covered in detail in the *HBR Guide to Generative AI for Managers* (Farri and Rosani)

Made with GAMMA

The AI Mindset(s)

Let's Dive In
